

Senior Panel Reaccreditation

Senior panel reaccreditation is conducted over two days.

The first day is an intensive training course, familiarising candidates with the techniques and equipment required to carry out the A.O.M. 133 module.

The training also includes a MET Complex refresher.

The assessments are completed on the second day.

- **A.O.M. 006. M.E.T. Complex**

Remove and replace vehicle interior and exterior trim (Bumper, door trim, lock mechanism etc) Remove a Xenon headlight (using any safety procedures) and refit and beam set using all correct tools and information provided in the vehicle repair methods.

- **A.O.M. 133. Bonding and mechanical fastening following repair methods**

Demonstrate your ability to follow repair methods.

Demonstrate your skills and ability in cutting, removing and replacing body panels using bonding and mechanical fastening techniques.

There will also be an **online test of 10 questions** with a **15 minute** time limit.

A **pass mark of 60%** is required.
